## Credit Management

**Alert:** Rate options require action today between 8 a.m. and 4:30 p.m. PT. Fixed-rate obligation 0000000109 of commitment 0000000067 matures today. [Act on Maturing Fixed Rate.](#)

**Access your loan accounts quickly and easily, right from your desktop.**

To view summary reporting about your loans, go to the [Loan Summary page](#).

To view information for a specific loan, select the appropriate loan detail using the pull-down list on the left. You can view current rates for your loan, select interest rates for loans with maturing rate options, and review loan transactions.

To view summary reporting about loan billing statements or to pay an invoice, go to the [Loan Billing Statements page](#).

**NEW!** Now you can advance funds and pay down principal online.

Converting prime-based funds to a fixed rate is now easy to do online, and Clients with rate options also have the opportunity to increase or decrease an obligation before fixing a maturing rate.

## Financial Risk Management

Help protect your business against interest rate fluctuations with Citi Bank hedging strategies. [Learn more](#)

## Benefits

By deploying web based FO2 Commercial Credit Card Manager, banks can enable their corporate and commercial clients to manage and control expense reporting process from easy to use web

- Corporate client self care to request new cards, manage existing cards, view statements, make payments, and request credit limit changes
- Easy to use web interfaces to submit, approve, and reconcile corporate expense reporting
- Manage automated and manual funds transfers and transfer initiation using checks, wires, ACH
- Corporate client self care to configure expense types and GL mapping based on different criteria
- Easy integration with GL and other financial institution data using ISO 8583 or proprietary formats
- Corporate client web interfaces for different types of roles – card holder, expense approver, program administrator, and reconcilierr

## FO2 Commercial Credit Card Manager

Credit Card Manager provides a browser based product for banks to deliver a full set of credit card expense reporting functionality to their commercial clients. The system has a full set of tools for business managers, at commercial clients, to manage expense reporting from web interfaces at the bank thereby eliminating paper process.

FO2 Commercial Credit Card Manager provides streamlined web access for different roles in expense processing - card holder, expense approver, expense reconciler, and credit card program administrator.

Commercial Credit Card Manager is a complete web based software platform built from state of the art technologies and security features. Compared to traditional client server based applications and paper based expense reporting, Commercial Credit Card Manager provides better efficiencies with full featured web platform that can be deployed for multiple business clients on the same system and provide efficient customer care.

Major features of the platform include but not limited to:

- Card Management – Search cards, add new cards, associate cards to employees, activate cards, cancel cards
- Transaction feed from different credit card types using ISO 8583/other proprietary formats
- User Management - business unit and employee hierarchy, add new users, manage existing user profiles, disable and enable users, cancel users
- Credit limit management – credit limit allocation based on hierarchy, credit limit allocation templates-

- configure expense types and GL mapping based on different criteria
- Easy integration with GL and other financial institution data using ISO 8583 or proprietary formats
- Corporate client web interfaces for different types of roles – card holder, expense approver, program administrator, and reconciler
- Consolidated web view of expenses by expense type, by company, by division, and by employee
- Web based business account and employee hierarchy set up
- n level business division and employee hierarchies and credit limits
- Switch from paper based statements and expense reporting to web based expense reporting
- Access to web based downloadable and searchable electronic statements and reports
- Consolidated current and historical view of transactions and segmented expenses
- Approval workflow process and user privilege management to provide enhanced security

Major features of the platform include but not limited to:

- Card Management – Search cards, add new cards, associate cards to employees, activate cards, cancel cards
- Transaction feed from different credit card types using ISO 8583/other proprietary formats
- User Management - business unit and employee hierarchy, add new users, manage existing user profiles, disable and enable users, cancel users
- Credit limit management – credit limit allocation based on hierarchy, credit limit allocation templates-
- Expense reporting from web
- Web based statements and reports
- Web based configuration for expense types and GL mapping
- Balance and transaction details
- Payment initiation and reporting
- Detailed workflow processes based on approvals
- Detailed graphical downloadable reports
- Built in security

## FO2 Commercial Credit Card Manager Features

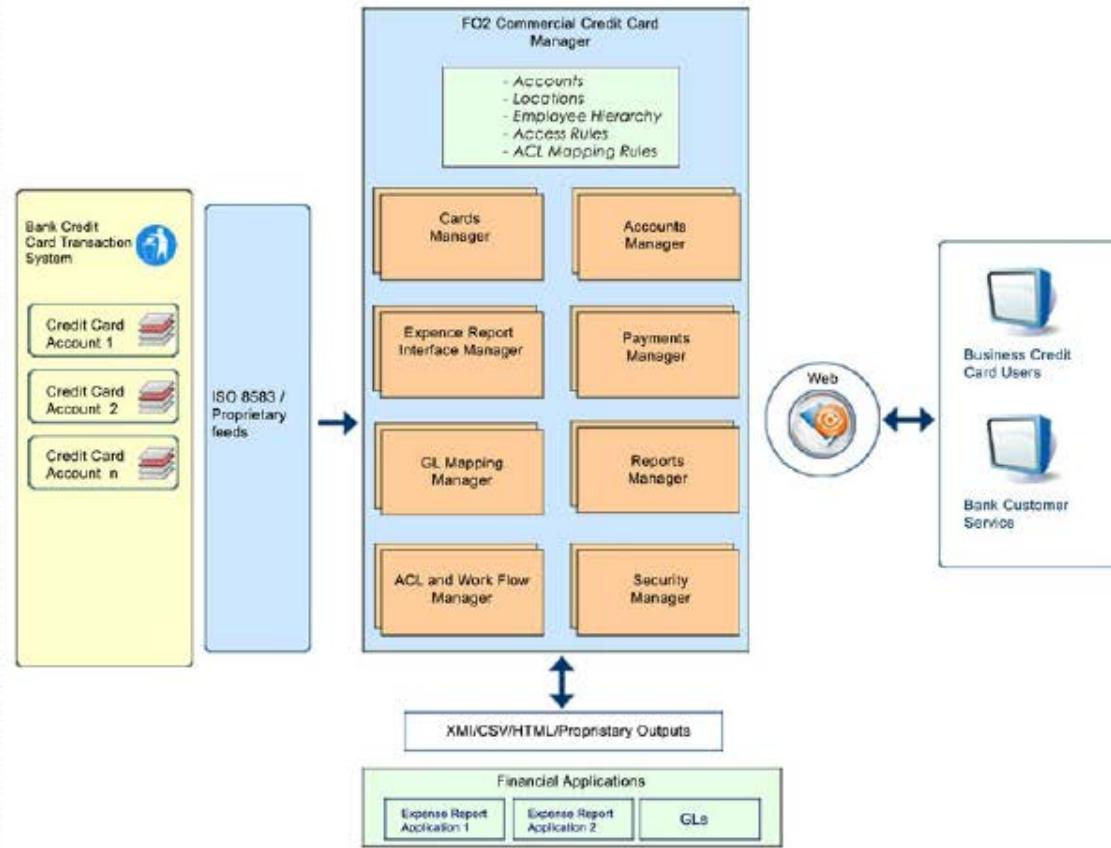

FO2 Commercial Credit Card Manager Platform provides the following modules and features to provide unified access to Commercial Credit Card reporting services.

### Accounts Manager

Provides web interfaces to create and manage corporate business accounts and account hierarchies. Accounts Manager feeds on different file format feeds (e.g., Microsoft Excel, HR systems like SAP and Oracle, XML or any proprietary interfaces) to create the employee hierarchy database.

## FO2 COMMERCIAL CREDIT CARD MANAGER

*Web based commercial credit card expense reporting*

***"Deploying web based FO2 Commercial Credit Card Manager allows banks to meet customer demand for web based expense reporting and transaction visibility and control from a single web interface across corporate hierarchy."***

### Cards Manager

Using Accounts Manager, corporate managers can operate and manage different user roles – card holder, approver, reconciler, and credit card program manager. Accounts Manager module also holds user profile and contact information databases. Web enabled access to creating new users, editing existing user profiles, enabling and disabling user accounts and, canceling user accounts is provided. Web based user profile search and multiple user profile edits are also provided.

## Latest News

**Sankalp Group** has bagged the "Fastest Growing Companies in India" award, based on a study carried out by Construction World and NICMAR.

## About Us

### Incorporation

Sankalp is a leading name amongst property promoters, developers, and builders in southern part of the Indian peninsula. The Company, for over ten years now, has been setting benchmarks in every aspect of the industry's operations.

### Vision

To meet the aspirations of every segment of society, who wish to possess a home which they can call their own, by adapting latest designs, technology and always delivering more, better and earlier, than what is promised - quality wise and price wise.

### Main objects

The main objects of the company inter alia are to undertake the business of property developers, town planners, and builders.

### Track record

Over the period of about ten years since it was activated, we have built over 7,00,000 square feet of elegant residential and commercial complexes in the cities of Bangalore and Mysore. The major focus area has been the city of Mysore, the erstwhile royal and cultural capital of Karnataka where, in recent times, the populace from overcrowded neighbor-hood metropolis and non-resident emigrants wanting to return to the ethnic roots are moving in, in search of cooler climes and relatively hassle-free lifestyles. Bangalore, admittedly a city which inspite of growing at an alarming rate too uncomfortable for the majority of its residents, as a target area for immediate future expansion cannot be ignored.

### Work philosophy and strategy

The Company believes in nurturing growth through value addition at every stage and without sacrificing financial prudence. Right from the site selection and concept formulation, to topping out and final delivery, Sankalp Group is unrelenting in its attention to minutest details.

At Sankalp, we have the tradition of giving each project, top of the line value addition coupled with clean, simple and elegant designs to ensure total customer satisfaction that makes every Sankalp project an invariable winner. It is a matter of pride for us that Sankalp buildings stand head and shoulders above any competition in comparable sizes and locations and are perceived - by patrons, by professionals and by competition - as a Leader, setting standards in the industry.

## Support

For each group of clients, an easy payout scheme can also be worked out under which they will have to pay only nominal amounts at the booking stage and will be supported by long term institutional loans and other assistance necessary to see that the target buyers won't have to empty their life savings to have a comfortable home to start with. We have already established tie-ups with reputed all-India banking and housing financing institutions for easy and hassle-free financing.

In fact, if there are sufficient numbers of aspirants belonging to a single industrial or commercial house interested to have a sort of exclusive group housing for themselves, we may develop and even reserve an entire block or two of the buildings to their specific requirements and tastes. Employers' participating in such project may add considerable value to the whole proposition from the employees' stand points of view too.

**Rental and Leasing services:** In addition, we also help corporate executives / employees to procure housing units (apartments of two and three bedroom) on lease we may even consider keeping a couple of such apartments / pent houses as transit accommodation for their traveling employees or guests. We are equipped to serve such accommodation on cost plus basis.

## Welcome to Good Dynamics

21 March 2016 at 10:54

Dear uattpcrm009,

You have been given access to a Good Technology mobile application provided by your company.

This email contains your UNIQUE ACTIVATION KEY and instructions for completing mobile application set-up.

If you have been given permission to use more than one application you should receive more than one email like this one. Each email has an Access Key which can be used to set up an application. You can use any of your Access Keys to set up any application, but you can only use each Access Key once.

Please follow these steps which will take no longer than 10 minutes to complete. Before you begin, ensure you have good mobile data or Wi-Fi coverage.

1. Obtain the required application, as follows:

CBG MYWB HK UAT

CBG YFP ID

Feature – App Store

HK-YFP

HK-RMWB

MyWB

Good Work

Feature - Docs Service Entitlement

Good Access

CBG HK YFP SAR UAT
